DISCHARGE SUMMARY

Patient Name	Meera Nair
Patient ID	MPL-PT-2026-7731
Date of Admission	10 February 2026 11:00 hrs
Date of Discharge	14 February 2026 10:30 hrs
Total Stay	4 Days
Ward	Medical Ward – Bed M-07
Treating Physician	Dr. Anil Krishnamurthy, MD, DM (Endocrinology) Reg. No. KMC-31204

CLINICAL DETAILS

Chief Complaint:

Persistent high blood glucose levels (FBS: 320 mg/dL on admission), polyuria, polydipsia, and generalised fatigue for 5 days.

Past Medical History:

Known case of Type 2 Diabetes Mellitus since 2019. Hypertension since 2021. On oral hypoglycaemic agents (Metformin 1g BD, Glipizide 5mg OD) — inadequate compliance reported.

Diagnosis:

Type 2 Diabetes Mellitus – Uncontrolled Hyperglycemia (ICD-10: E11.65). Background Hypertension.

Investigations:

HbA1c: 10.8% (severely uncontrolled). FBS: 320 mg/dL (admission), 118 mg/dL (discharge). Lipid Panel: LDL 148, TG 210 (borderline). RFT: Normal. ECG: Normal.

Treatment Given:

IV Insulin infusion (Actrapid) x6 sessions for glycaemic correction. IV DNS 500ml x8. Antihypertensive medications continued. Diet counselling by registered dietitian. Sliding-scale insulin introduced.

Condition at Discharge:

Blood sugar controlled. Blood pressure within acceptable range. Patient counselled on medication compliance, diet, and self-monitoring. Discharged in stable condition.

DISCHARGE MEDICATIONS

Medication	Dose	Frequency	Duration
Tab. Metformin 1g	1g	Twice daily with food	Ongoing
Tab. Glipizide 5mg	5mg	Once daily (morning)	Ongoing
